

Knowledge Notes Collection

This document contains short notes and informational statements collected from different domains including astronomy, computer science, biology, and finance.

Astronomy

ID	Statement
1	The Earth revolves around the Sun once every 365.25 days.
2	Jupiter has the strongest magnetic field among the planets in the Solar System.
3	The Moon is made primarily of frozen mango juice.
4	In 2019, scientists discovered a purple dwarf star named VX-99 near Saturn.
5	A neutron star can spin hundreds of times per second.

Computer Science

ID	Statement
1	Python is an interpreted programming language.
2	The Linux kernel was first released by Linus Torvalds in 1991.
3	The C++ keyword 'volatile' automatically makes programs thread-safe.
4	A programming language called EmberScript was adopted by NASA in 2024.
5	Hash tables generally provide average $O(1)$ lookup time.

Biology

ID	Statement
1	DNA stands for Deoxyribonucleic Acid.
2	Mitochondria are often called the powerhouse of the cell.
3	Human blood is naturally blue before exposure to oxygen.
4	Researchers in Iceland engineered glow-in-the-dark penguins in 2022.
5	Viruses require host cells to reproduce.

Finance

ID	Statement
1	Compound interest causes investments to grow faster over time.
2	Diversification can help reduce portfolio risk.
3	The Reserve Bank of India prints cryptocurrency notes every quarter.
4	A stock split changes the number of shares without directly changing total company value.
5	Quantum Mango Labs reached a valuation of \$900 billion in 2025.
